TECHNOLOGY TRACK: THE EVOLUTION OF SPEECH RECOGNITION SOFTWARE—YOU WON'T BELIEVE HOW GOOD IT HAS BECOME

Lawyers have to draft documents, capture time entries, respond to emails, and enter case-related information into a file (or case management system). But, many lawyers just aren't good typists. With many lawyers having limited or no access to support staff, lawyers have to be far more self-reliant than they are used to. Thankfully, speech recognition technology can help. The software types exactly what you're saying and can be used for automatic transcription, time entries, and any drafting task without ever touching the keyboard. Learn how it works and what you need to incorporate it into your practice. We'll focus on the popular Dragon Professional software application.

TECHNOLOGY TRACK: AVOIDING MALPRACTICE: THE GOOD, THE BAD, AND THE UGLY OF LEGAL TECHNOLOGY

Legal technology is a double-edged sword in that it can cause malpractice or it can guard against it. Further, lawyers receive and have to manage electronic data which can be easily lost or stolen. Avoid common mistakes while using technology to your advantage by building malpractice avoidance procedures into your workflow. No technology background required to understand these concepts, and almost all of them will improve your office's overall efficiency, level of client service, and profitability.

MARKETING/LPM TRACK: TIME MANAGEMENT IS FOR SUCKERS: CONVERT YOUR TIME INTO WEALTH

We all get the same amount of time. The president of the United States, a middle-school teacher, a retired physician, and a "leisure professional" have the same hours per week ... the same weeks per year. Choosing how to allocate your time based on your priorities is essential to achieving what you want to succeed. In everything we do, we must choose to spend the time we have on either low value, or high value endeavors. Understand the three mindsets that are impacting your time, and how to adopt the entrepreneurial mindset in your law firm business.
