## **Internet Explorer**

Open your Internet Explorer browser and click on the **Settings** icon. It's the one that looks like a gear. Now click on **Internet options**. A new window will open.

On the far right side, you will see a tab labeled **Advanced**—click on it. In the **Settings** area, scroll down until you see the options **Use SSL 2.0** and **Use SSL 3.0**.

If there is a checkmark in those two boxes, uncheck them by clicking on them. Make sure the boxes labeled **Use TLS 1.0**, **Use TLS 1.1** and **Use TLS 1.2** are checked. (If you don't have three TLS boxes, you should <u>update Internet Explorer</u>.) Finally, click on the **Apply** button, and the **OK** button. Your Internet Explorer is now POODLE proofed.
